aesthetic solutions using
preserved plants

Unfolding the secrets
of nature

Greenmood

About us

Founded in the heart of Europe, in Brussels, Belgium, our company introduces a new and revolutionary plant design concept.

We offer fully preserved natural plant products that combine aesthetics with high-level acoustic absorbance. Our handmade products contribute to increased performance and higher levels of wellbeing within your workforce.

We design and deliver all the structural and natural elements you need to reduce sound levels and increase the visual appeal of your interior space.

Thanks to their unique ecological process – completed without the addition of any dangerous toxins, chemicals or components – all our mosses and foliage are totally maintenance free: they require neither pruning, nor watering, nor even sunlight.

Peace, quiet, wellbeing; inspired by nature.

Welcome to Greenmood.

Moss harvested manually in European Forests

Absorb sound, soothe the mind & ease the spirit

About Custom Made

Natural preserved plants and mosses - requiring no maintenance at all - provide a great versatility: thanks to their characteristics we can imagine endless possibilities of interior design creations, fulfilling all your wishes.

Whether you want a Green Wall, Green Logo, Frames, or any kind of custom work combining various processes, our experienced team of professionals will advise you on the best choices to suit your individual requirements, right from the conception stage.

Whatever your vision, we can help you find the preserved plant products to match your design scheme.

From ambient noise reduction to the aesthetics of an interior space, we create commercial environments conducive to productivity and wellbeing.

Designed by and for architects

100% handmade production

Noise Reduction

The secret to a well-balanced corporate interior is not just in how it looks and functions but also in how it sounds. The acoustic ambiance of a room, whether an office space or a lobby, is every bit as important as the layout and décor.

In large interiors, such as open-plan office spaces, a lot of noise pollution is produced. With so many conversations going on, phones ringing, tapping of keyboards, papers being shuffled and outside traffic sounds, there's a continuous din. In many offices and workspaces this background noise far exceeds the recommended 45 decibels.

The result? Poor concentration, reduced levels of collaboration, headaches, increased stress, and discomfort.

Effective acoustic solutions inspired by nature

The solution is to reduce this ambient noise for the benefit of management, employees, and visiting customers and clients. This is best achieved with acoustic

elements which reduce sound spread, reverberation and echoing. Our creations at Greenmood are specifically designed to absorb sound, the natural way.

All our projects are made using preserved mosses, with acoustic benefits at the forefront of their creation. Once installed in an interior, they help to smooth ambient noise and reduce overall sound to acceptable decibel levels.

They sound good, they look good, and they also help you feel good.

Proven acoustic results

We asked CARE CEDIA to test the performance of our products when it comes to sound absorption. The laboratory provided us with detailed reports showing the undeniable sound-reducing qualities of the natural moss.

The tests were conducted in accordance to the ISO 11654:1997 standard (laboratory-based sound absorption coefficient measurements using 10m² for each moss).

Acoustic solutions never looked so natural

Plant types

Lichen
(Reindeer Moss)

Our Reindeer Moss is grown in North European forests and is exclusively hand-picked by local producers, in keeping with ancestral sustainable methods respectful of the environment.

It is a natural fire retardant lichen that can be used only indoors, and must be guaranteed an environment with a minimum relative humidity of about 30%. That said, it does not need any maintenance at all.

Ball Moss:
Nature in volume

Preserved Ball Moss is generally used to add texture to a green wall base. Ball Moss gives you a vibrant colour & texture to any space with 3D effect on your green wall.

They are all sustainably harvested and preserved using natural glycerine.

Provence Moss:
Wild Elegance

This padded moss is found in European forests, on acidic soil under tall softwood trees.

By choosing the best parts of the moss carpets, we obtain a deep green moss with bright green reflections on its extremities, giving an elegant and design-friendly appearance supplementing its texture.

Forest:
Lush foliage

Our Forest designs give your walls a true wild forest feel while enhancing both the acoustic and visual ambiance.

Their preservation process let us use all the benefits of real plants for interior design, without any disadvantages. They require absolutely no maintenance, no watering, no sunlight, nor any pruning whatsoever.

Twinkles

These playful graphic tools can be used to deliver added visual contrast and interest to classical preserved green walls. The designs you can potentially create are endless in scope and possibility.

There are five standard patterns and seven different module designs, including linear and curving shapes, which can be mixed together or used uniformly on one wall.

Green Logos

Your brand image is one of the most important features of your company. Whether it's your logo or the signage within your business premises, your corporate look needs to be both visually appealing and memorable.

With Green Logos, you can achieve both, and more! We design personalized logos made from 100% natural plant. Preserved using eco-friendly techniques, these green designs will last for years, without the need for watering, maintenance or sunlight.

Send us pictures of your logo and details of your project. We'll then arrange to discuss your requirements in more detail so we can help you choose the best options for your nature-inspired branding, like:

- Which moss to use
- The framework material
- The colours and sizes
- The style of filling...

Creating inspiring
and healthy work
environments

Ball Moss: Nature in volume

Preserved Ball Moss gives a vibrant color & texture to any space while also adding volume to a flat surface.

Hand-harvested in European forests, these mosses of best quality will bring you a green lifestyle to your space.

They are all sustainably grown and preserved using natural glycerine and food dyes.

The Ball Moss provides the best acoustic absorption performance, even better than some specialized synthetic products.

Totally maintenance free

Organic looking color from natural dyes

Provides peerless acoustic absorption performances

Provence Moss: Wild elegance

This padded moss is found in European forests, on acidic soil under tall softwood trees.

Harvested manually and selectively by professionals, it is put through a preservation process, using natural and non-toxic products just like the ones used in the food industry.

By choosing the best parts of the moss carpets, we obtain a deep green moss with bright green reflections on its extremities, giving an elegant and design-friendly appearance supplementing its high acoustic absorption qualities.

Twinkles

Design by Alain Gilles

These playful graphic tools can be used to deliver added visual contrast and interest to classical preserved green walls. The designs you can potentially create are endless in scope and possibility.

There are five standard patterns and seven different module designs, including linear and curving shapes, which can be mixed together or used uniformly on one wall.

Each module is easily attached, sticking out beyond the organic material and is available in four different powder coating finishes: Matte White, Matte Black, Corten & Gold.

The Twinkles are ideal for any type of interior environment, including corporate lobbies, hallways, open-plan offices, waiting rooms and exhibition spaces.

Green Logos

Your brand image is one of the most important features of your company. Whether it's your logo or the signage within your business premises, your corporate look needs to be both visually appealing and memorable.

With Green Logos, you can achieve both, and more! We design personalized logos made from 100% natural plant. Preserved using eco-friendly techniques, these green designs will last for years, without the need for watering, maintenance or sunlight.

They imbue the stunning beauty of the natural world and have the inherent acoustic qualities of a woodland. Your logo – your corporate identity – will be transformed into a natural feature to impress visitors and enhance the acoustic peacefulness of the surrounding space.

All logos and signage are handmade in our workshop by our experienced and expert team. Everything is bespoke and created specifically to your exact tastes, dimension requirements, and brand identity.

Let us help you incorporate the breathtaking power of nature into your company interiors – thereby softening the corporate hardness, and cultivating wellbeing in both your visitors and your workforce.
