

JANUS et Cie®

SPECS

The JANUS et Cie sun icon indicates products that are suitable for both interior and exterior use. Many are available in proprietary materials such as JANUSfiber®—a synthetic JANUS et Cie material engineered to withstand the effects of weather and time—or JANUSwood®, a visionary and virtually maintenance-free product that exists in harmony with consumer needs and environmental health while offering durability, UV resistance and chemical resistance. Our wood furnishings are produced from only the highest grades of plantation teak and Iroko woods chosen for their beauty and longevity. Achieved through extrusion and molding, our polypropylene products are virtually indestructible and offered in a spectrum of colors. JANUS et Cie exterior woven products are supported by durably constructed aluminum, treated carbon steel or stainless steel frames finished with our proprietary JANUScoat™ powder coating process.

Offered in an array of textures, weaves, materials and finishes, JANUS et Cie exterior pieces harmonize seamlessly with our interior collections and are equally at home indoors and out.

Our house icon designates products designed specifically for interior use. Crafted by skilled artisans of the highest grade materials, all of our superb interior pieces are durable and infinitely beautiful. Due to natural variations in these materials, some finishes may vary slightly. When used and cared for properly, our interior furnishings will endure over time.

The umbrella icon marks items that are perfectly suited for covered outdoor areas in restaurants, hotels, spas, corporate campuses, public spaces and right at home. For added protection, custom furniture covers are available for all JANUS et Cie furnishings.

The JANUS et Cie Masterpiece designation is applied to collections which flawlessly achieve an unparalleled level of complexity in both design and fabrication. Beginning with exquisite composition, each piece is rigorously engineered with the finest materials and finishes available, then masterfully hand crafted employing time honored traditions. Products in the Masterpiece offering take months to produce, representing the most exclusive and intricate furniture we offer.

Wisp hurricane lanterns are made from teak and Wisp aluminum lantern is made from aluminum with JANUScoat™. Available in all countries.

CUSHIONS &
TOSS PILLOWS

DESIGN

BOXED

A standard box cushion has a flat top, flat bottom and four sides that are created by sewing a separate piece of fabric to connect the top and bottom. It can be any shape: round, square, rectangular or cut to a particular shape, such as a bay window seat, for example.

WATERFALL

These cushions have one piece of fabric that wraps around the top, front and bottom of the cushion and provides a nice smooth, rounded front without any seams. The sides and back have boxing.

KNIFE EDGE

A knife edge cushion style is made by sewing the top and bottom fabric panels together to make a more traditional sewing seam, which is mid-height on the sides of the cushion.

CHANNELED

Channeled cushions are knife-edge cushions which have had their internal filling material quilted into the cover material in channels.

FILL

HR

This fill is polyurethane foam that has 2.5 pounds per cubic foot density. It is the highest quality foam used for outdoor seating.

RETICULATED

Reticulated foam is polyurethane foam with open cells, allowing liquids to pass through rather than becoming trapped inside.

IMO

IMO foam is reticulated foam that has been combustion modified to qualify for use in maritime installations.

DACRON/BONDED POLYESTER

Dacron or bonded polyester is polyester fiber that has been bonded together into a sheet, giving the plushness of polyester fill while not shifting around the way a loose fill would.

SHREDDED FOAM

Shredded HR and reticulated foam is used to either meet certain specifications, or for cushions that have an intentionally worn-in appearance. The material is supportive yet conforms well to any frame shape.

STANDARD FILL

A pillow fill made of polyester fiber, standard fill is both light and supportive.

LEVEL II FILL

Level II fill is a pillow fill made of extra-fine polyester fiber that has a weighty and luxurious feel.

PREMIUM FILL

Premium fill is a pillow fill made of clustered polyester fiber that has greater longevity and a medium weight with good support.

EMBELLISHMENTS

BUTTERFLY CORNERS

Butterfly corners are an extra detail added to flanges. They are characterized by a small pleat in the corner, giving the corner a more tailored look.

WELT/MINI WELT

Welt and mini welt are edge embellishments that can be used on both cushions and toss pillows. They consist of a long strip of fabric wrapped around a cord.

**FLANGE/MINI FLANGE/
KYOTO FLANGE**

Flange, mini flange and Kyoto flange are edge embellishments that can be used on both cushions and toss pillows. They consist of a long strip of fabric folded and creased to form a flat flap of fabric.

BELT STITCH

The belt stitch is an edge embellishment that is only available for knife edge cushions. It is a stitch that is applied 1/2" from the edge of a knife edge cushion, creating the appearance of a flap of fabric around the edges of the cushion.

TOP STITCH

The top stitch is an embellishment available for boxed cushions. It is a line of stitching added to the boxing of the cushion toward the top edge, tacking the inside hem to the boxing. This creates greater strength in that seam, as well as a beautiful aesthetic detail.

BASEBALL STITCH

The baseball stitch is an embellishment available for both cushions and toss pillows. It consists of a piece of reinforcing seam tape sewn to the inside of the cushion/pillow cover with two lines of sewing—one on each side of the seam. This creates a unique aesthetic as well as considerable reinforcement for the seams it is applied to.

WHIP STITCH

The whip stitch is an edge embellishment primarily used on knife edge cushions. The whip stitch consists of threads being pulled over the edge of the two sides of the knife edge cushion it is applied to, creating a flange-like appearance that is wrapped in thread.

JANUS TACK

The JANUS tack is an edge embellishment that is applied 1/4" from the seams of a cushion or toss pillow. JANUS tack is a skip stitch used to accent a cushion at the edge. Color must be specified at the time of ordering.

COVERED BUTTON

The covered button is an embellishment that can be added to both cushions and toss pillows. It consists of a small button "upholstered" in a fabric of the client's choice with some limitations. The button is then applied to the cushion by piercing the finished cushion and attaching the end of a cord to another similarly "upholstered" button. This creates a cushion that cannot have its cushion cover removed.

BLIND TUFTING

Blind tufting is an embellishment that can be added to cushions or toss pillows. It consists of a stitch in the material sewn to a cord and tacked to an anchor either inside the cushion or to a stitch on the other side of the cushion. This creates a cushion that cannot have its cushion cover removed.

GUAVA STITCH

Guava stitch is an edge embellishment available for both cushions and toss pillows. It consists of a stitch 1/8" from the seam along the entire cushion.

RUSH STITCH

Rush stitch is an edge embellishment available for both cushions and toss pillows. The Rush stitch is a special embroidery stitch added to the edge of a cushion, usually on the face.

ATTACHMENTS

SNAPS

Snaps can be housed on either webbing when hidden, or in corresponding fabric with the body of the cushion if they need to be visible. Snaps are not recommended for applications where the snap could touch a painted or powder coated frame directly.

JANUS BUTTON/CORD

JANUS button/cord consists of a stainless steel button with our JANUS logo which attaches to the loop of woven cord. This is the most aesthetically pleasing visible attachment. It is not recommended in any area that comes in contact directly with a wood or metal frame.

VELCRO

Velcro can be housed on either webbing when hidden, or in corresponding fabric with the body of the cushion if it needs to be visible. Velcro attachments are not recommended where the velcro might come in contact with rope woven frames.

FABRIC TIES

Fabric ties are sewn strips of fabric used to tie directly to the frame. The textiles that can be used for fabric ties are limited to plain weave materials of low thickness.

BELT LOOP

Belt loops are sewn strips of fabric added to cushions to create an attachment location for other cushions or toss pillows.

D-RINGS (HEADREST ONLY)

D-ring style attachments are used for long straps only. A 1" fabric strap is pulled through both D-rings and comes back through only one D-ring, creating a belt-like cinching method.

WEBBING

Webbing is a woven material used as an attachment due to its low profile and strength.

SPLINE TUBING

Spline tubing is an attachment method only used on specific frames which have a groove for the tubing to correspond to. The tubing is sewn into a cushion and the tubing wrapped in fabric is pressed into a corresponding groove in the frame.

CUFF ATTACHMENT

Cuff attachment is a flap of fabric sewn into a fold which goes over the top of a backrest.

CONSTRUCTION

NET LINER
Ultra-thin layer of polyester which helps to bind the dacron and foam of a cushion together for ease of stuffing and unstuffing.

WATER-RESISTANT MUSLIN
Water-resistant muslin is a 100% polyester material which allows water to bead and roll off.

ZIPPER
JANUS et Cie uses special zippers which resist corrosion in the harshest environments.

GROMMET
Grommets are made of nickel-plated brass and are used primarily on furniture covers to allow a cord to pass through. Grommets can also be used to vent cushions made of vinyl to allow the cushion to breathe.
